Basic Auton NEAR: LEAVE + PARK (WMS Irondogs)

Robot's BACK against our alliance wall, next to the LOADING ZONE. OpModes: "Basic Auton RED NEAR" and "Basic Auton BLUE NEAR".

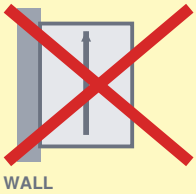

SET UP

BACK against the wall

YES: back on the wall

NO: side on the wall

RED:
tile A6, BACK touching the RED wall, FRONT facing into the field

BLUE:
tile F1, BACK touching the BLUE wall, FRONT facing into the field

Same as the SET UP line on the INIT screen

Filled box = START (arrow = FRONT, black bar = BACK on the wall). Numbered circles = waypoints. Dashed box = where it PARKS.
Robot size used: 17.98 x 15.99 in (BasicAuton.ROBOT_LENGTH_IN / ROBOT_WIDTH_IN). Blue = Red rotated 180° (decision 011).
HIVE: the UP CELLS shown are at MATCH START (Red: audience side, Blue: far side). Every TIP flips which CELL is up.

The steps (from BasicAuton.java, in inches)

Step	RED x, y, heading	BLUE x, y, heading	What happens
Start	60, 63.01, -90°	-60, -63.01, 90°	Robot set up here. Nothing moves during INIT
1	60, 50, -90°	-60, -50, 90°	LEAVE: drive straight forward, off the red wall
2	40, 60, -90°	-40, -60, 90°	PARK: slide toward the audience, partly into the LOADING ZONE, off the wall

Test log: 5 good runs in a row = ready for competition

Run	Red / Blue	Delay (s)	Parked? (Y/N)	Lights	Time (s)	Notes (overshoot, short, bumped...)
