Basic Auton FAR: LEAVE + PARK (WMS Irondogs)

Start against the audience wall (Red) / far wall (Blue). OpModes: "Basic Auton RED FAR" and "Basic Auton BLUE FAR".

Filled box = START (arrow = front of robot). Numbered circles = waypoints, driven in order. Dashed box = where it PARKS.
Robot size used: 18 x 18 in (BasicAuton.ROBOT_LENGTH_IN / ROBOT_WIDTH_IN). Blue = Red rotated 180° (decision 011).

The steps (from BasicAuton.java, in inches)

Step	RED x, y, heading	BLUE x, y, heading	What happens
Start	-63, 36, 0°	63, -36, 180°	Robot set up here. Nothing moves during INIT
1	-48, 40, 0°	48, -40, 180°	LEAVE: drive forward, off the audience wall
2	24, 40, 0°	-24, -40, 180°	drive up column B, clear of the HIVE (column C, y < 24)
3	30, 58, 0°	-30, -58, 180°	PARK: in the field end of the LOADING ZONE

Test log: 5 good runs in a row = ready for competition

Run	Red / Blue	Delay (s)	Parked? (Y/N)	Lights	Time (s)	Notes (overshoot, short, bumped...)
